

## CERTIFIED FAMILY RECOVERY SPECIALIST

### Training Opportunities

The Certified Family Recovery Specialist (CFRS) is PCB's newest certification. As such, training can be difficult to find. PCB is working diligently with many providers who already offer the Certified Recovery Specialist (CRS) training to develop training for the CFRS. In an effort to help those who are seeking the CFRS, we will continually update this list until we feel there are enough trainings throughout the Commonwealth. If you are a training organization or trainer interested in offering training opportunities for the CFRS, please email Deborah Haas at [dhaas@pacertboard.org](mailto:dhaas@pacertboard.org).

There are two categories listed below: full training series (for those who do not already hold another certification with PCB) and trainings for those who already hold the CRS. If you hold an active CRS, you only need six (6) hours in Family Recovery and Wellness to complete the 60 hour requirement. **You cannot use the same training more than once. If you have already completed one of the courses below, you cannot take it again to submit it for the CFRS.** If you hold a different certification with PCB and are interested in the CFRS, you will need to submit education for review. You can do this by emailing [info@pacertboard.org](mailto:info@pacertboard.org). **To sign up for any of the trainings below, you must contact the organization directly.**

#### **FULL TRAINING SERIES**

**Organization:** Be a Part of the Conversation
