

PCB Annual Conference: Request for Presentations

Submission Deadline: September 30, 2018

In 2019, PCB's Conference will be extra special as we celebrate the 40th Anniversary of PCB for two full days. We invite you to share your expertise and passion for the field with the hundreds of other behavioral health professionals who will be in attendance.

PCB encourages training submissions that are tailored to intermediate and advanced professionals with special consideration given to content that is evidence-based and cutting edge or offers a new approach to the tried and true.

The conference audience is composed of a wide variety of skill sets and education backgrounds including individuals with varying levels of degrees, and addiction, mental health and family peer providers. We host clinicians, social workers, administrators, supervisors, and psychology and psychiatric professionals as well as professionals from the criminal justice system.

The majority of those who attend have been in the field for 10+ years and are conversant and trained in a host of counseling and treatment strategies. When crafting your training proposal - consider creating the presentation you would most like to experience yourself. **We discourage presentations that are developed to advertise or market a specific treatment center's approach.** We encourage presentations that may refer to a specific approach, but disseminate the approach as it is contextually appropriate to the other evidence-based methods practiced.

Take advantage of this opportunity to share your talent, expertise and passion with colleagues and interested professionals at PCB's Annual Conference.

For more information or questions, contact Deborah Haas, MS Ed., Director of Training and Education at (717) 540-4455 ext. 106 or dhaas@pacertboard.org.

PCB TRAINING PROPOSAL INFORMATION

PREPARING TO WRITE AN EFFECTIVE CONFERENCE TRAINING PROPOSAL The primary purpose of a training proposal is to briefly describe the content and methods of instruction to your intended audience. A carefully crafted proposal will convey the most relevant elements of the training to those whom will most benefit from the training and offer a clear description of what they can expect if they attend.

KEEP IT SHORT. The proposal should be between 250 to 300 words. The proposal should be written as only one paragraph with no indentation. To succinctly describe your training, you will need to determine which elements are the most important. Structure the proposal in the same order as the proposed training. Begin with a summary of the training, and then continue with a summary of the goals and learning objectives and how these will be presented.

TRAINING TOPIC SUGGESTIONS

Recovery/Peer Specialists

- What is my role in treatment?
- MH/SUD Peers and Acceptance of a variety of views and experiences
- Peers: working together- MH/SUD

Treatment Approaches
